

FEATURES

- **Comprehensive and accurate** URL database with more than one billion entries grouped into education-specific categories.
- **Multiple layers of anonymous proxy detection** and blocking to keep users from bypassing your filter and accessing blocked sites.
- **Protection for school computers outside the network** - without a VPN, from any location, with any type of Internet connection - via the Guide Mobile Filter.
- **Flexible filtering for thin clients**, including NComputing, Citrix, and Windows Terminal Server.
- **Ability to create different policies** based on user, group, organizational unit, IP, domain.
- **Peer-to-peer application** and file-type blocking.
- **Educational Video Library** allows teachers to share approved YouTube videos with students.
- **Integration with Student Information Systems** for comprehensive, individualised user information and custom reporting.
- **netTrekker d.i. integration** to ensure seamless access to approved netTrekker sites.
- **Daily signature updates**, and immediate emergency updates, directly from Lightspeed Systems.
- **Ability to accommodate even the heaviest traffic loads**, up to 1 GB of Internet bandwidth, without hindering performance.
- **NEW! My Big Campus** offers safe access to Web 2.0 tools, including a Resource Library to post, view, and share online resources as well as a Collaboration site.

Also available as the Lightspeed Rocket, Web Access Manager, an appliance-based solution for high-capacity networks.

Ensure safe web browsing with customisable filtering and features for safe Web 2.0 access

Compliance, policies, safety, and security all make an Internet filter essential in education. But over-blocking limits the potential of the Web to promote learning and acquisition of 21st-century skills. Web access management needs to do more than filter inappropriate content - it needs to balance educational Web 2.0 use with network security and student safety.

Lightspeed Web Access Manager provides an intelligent solution for web filtering - offering features for customisation, granular policy control, safe Web 2.0 access, and mobile filtering - to ensure that inappropriate sites are no longer a click away, but that valuable content remains available to students and teachers.

BENEFITS

Protects users from inappropriate material on the Internet. Web Access Manager detects and/or blocks access to inappropriate material on the Internet based on our extensive, education-specific URL database, as well as your own custom allow and block lists.

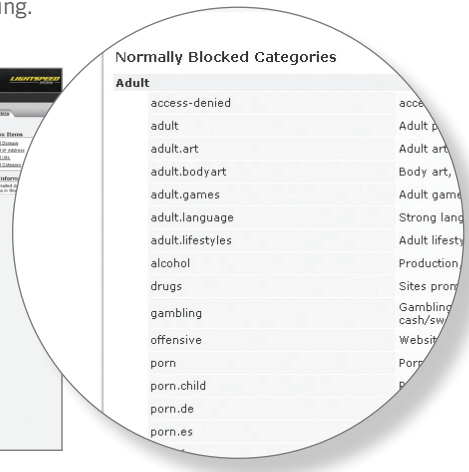

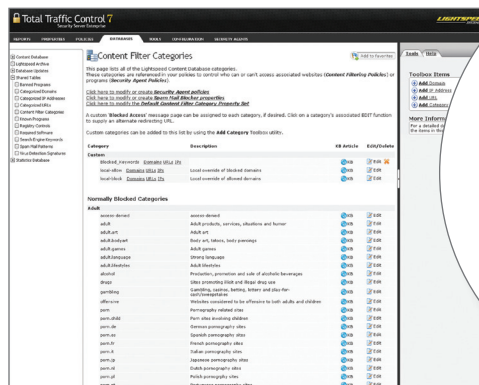

Keeps searches safe. Web Access Manager ensures that search results on Google and other popular search engines do not include inappropriate sites or images, such as pornography and sexual content.

Provides safe Web 2.0 access. Web Access Manager promotes a balance between learning and security by offering safe, easily-managed ways to access Web 2.0 tools and resources, share online resources, and engage in participatory learning.

Comprehensive, Customisable Reporting

Web Access Manager gives you access to comprehensive information about who is viewing what over the Internet, so you can adjust Acceptable Use Policies, change allowed usages, review problems and troubleshoot issues, and plan for ongoing needs. You can see a high-level overview of content viewed and blocked, and then drill down for detailed information, with reports like:

- Blocked Content
- Search Engine Queries
- Blocked URLs
- URLs visited
- Traffic by Category
- Overrides (active and history)

LightSpeed

Web Access Manager

Network Solutions for Safe Online Learning

Software solutions

Manage your education network with our all-in-one solution or its components:

LightSpeed
Total Traffic Control

Filter, secure, manage, and monitor with a single solution.

LightSpeed
Web Access Manager

Ensure safe web browsing with customisable filtering and features for safe Web 2.0 access.

LightSpeed
Email Manager

Archive and report on communications, while blocking spam.

LightSpeed
Security Manager

Block viruses, spyware, and malware with desktop and gateway security.

LightSpeed
Network Traffic Manager

Control traffic with bandwidth management.

LightSpeed
Power Manager

Manage energy use with automated power management.

High-capacity network solutions

High-performance, scalable appliance-based education network solutions:

LightSpeed
Rocket Web Access
Manager

Ensure safe web browsing on your high-capacity network with comprehensive, customisable filtering and features for safe Web 2.0 access.

LightSpeed
Rocket Email
Manager

Efficiently block spam on your high-capacity network, while archiving and reporting on communications.

Extend your high-capacity network solution with the addition of our other software products.

Get a comprehensive, cost-saving solution for your high-capacity network by combining the two Rocket appliances with Security Manager, Network Traffic Manager, and Power Manager.

About LightSpeed Systems

LightSpeed Systems Inc., founded in 2000, develops comprehensive network security and management solutions for the education market. We are committed to helping schools operate their networks effectively and efficiently, so educators can provide safe online teaching and learning environments.

Exceptional Service and Support

Our unparalleled service and support mean our solutions will continue to deliver, long after their easy implementation. With any LightSpeed Systems solution, you can depend on:

- Live-person phone technical support.
- Comprehensive online knowledge bases.
- The LightSpeed Wiki, rife with user collaboration and product expertise.

Professional Development & Training

Professional Services: We provide customised, collaborative professional development services to address your specific needs.

Training: To help you fully leverage your investment in LightSpeed Systems solutions, we offer an array of training options.

- Online introductory training and user demonstration videos.
- Administrator certification.
- Onsite training throughout the UK.
